

# Mentoring Evaluators What's Happening in Canada

## **Core Mentoring Working Group**

Evaluators who **volunteer**ed their time to our efforts, develop a National Mentoring Program for Evaluators (NMPE) in Canada.

Based in three cities, we initiated efforts separately *Lisa O'Reilly* and came together as a group in the spring of 2009.

Thank you for interest in

Pilot

Survey asked, "Would you be interested in

participating in a national mentoring

program as...

mentee,

32%

19%

Our efforts drew on evidence, best practices, and lessons learnt that included:

- a targeted literature review
- a review of secondary data
- a national on-line **survey** of Canadian evaluators (n=432)
- informal consultations with representatives from Canadian and American evaluation organizations as well as knowledgeable practitioners in designing and implementing professional mentoring programs
- feedback and further insights shared with CES national executives and workshop participants at regional and national CES conferences

mentor(s) or mentee(s)?"

61% E-mail

47% Telephone

79% Face-to-face interaction

29% Group in-person meetings

## our Research

■ % of respondents rating program component as...

Characteristics of mentorship program, as described by survey respondents.

87.3

Demand for a mentoring program for

evaluators

72% of respondents don't have

Q1 Do you have a mentor?

#### The **literature review** asked:

- 1. What are the advantages / disadvantages of mentoring in evaluation for each of mentors, mentees, and the respective organizations involved?
- 2. What types of mentoring **programs exist**? What advantages / disadvantages are associated with each? Which one(s) work the best for whom, and why?
- 3.What potential models / options / strategies exist for establishing a mentoring program? How well are they working?
- 4. What aspects and / or characteristics of a good

mentoring relationship need to be regarded? Specifically:

- a) How are mentoring initiatives (programs and networks) **supported**?
- b) What are the **necessary relationships** / collaborations / partnerships?
- c) How are mentees / mentors best engaged in the process?
- 5. What issues and or **risks** are important to be aware of when developing, delivering, and monitoring a mentoring program?
- 6. What theories / conceptual models support mentoring as a career development tool or strategy?

## our Questions

**Implications** 

These are

success

factors to

monitor and

evaluate

strategy

# **Mentees**

Vant

Messages in recruitment

Messages in marketing the mentoring program

 Source of feedback and strategies Personal development

 New or more challenging work projects

#### Mentors

- Development of discipline/next generation of evaluators
- Obtain fresh perspectives, knowledge and skills
- Opportunity to demonstrate and enhance leadership

## **Organizations**

- Lower turn-over, employee retention
- Organizational cohesiveness Succession planning and organizational growth

## Training for both mentors / mentees,

- Suggested guidelines
- Competency self assessments\*

including support materials:

- Code of ethics\*
- \*Using CES materials as a starting point

## **Orientation**

Options:

• Online or in-person in the early phases of the program.

voluntary (regional) leads with

Subsequent program phases

Transition to a Mentorship

support from members of the CMWG

- Self-matched, or through a coordinator
- Mixers
  - (informal in-person events)

**Coordination** 

## **Matching processes**

## Participants may be:

- in remote areas • in the same or different geographic locations
- interested in the same or different interests

## **Location and distance**

#### We have estimated that the pilot will require up to \$10,000.

Web of mentors and mentees

Focused on specific capacities

Estimates of ongoing costs vary from \$10,000 - \$80,000 per year depending on the components included following the pilot.

## **Budgeting**

#### The working group has three governance options: • continue as an ad hoc group,

- register as a not-profit
- partner with a like-minded organization

## **Governance options**

We have solicited support from the CES and its regional chapters. We have had discussions with the CESEF – a charitable education fund – on potential fund raising support. We have received commitments for

## **Funding**

## Managing expectations and liabilities

Accountability to participants, volunteers and supporters

funds and in-kind support.

## **Other considerations**

## We have formed a partnership with Carleton University, Graduate Diploma in Public Policy and **Program Evaluation** (DPE).

Two students within the Program's Capstone course will develop an evaluation framework for the pilot project.

Our thanks to their instructor: Steve Montague, and of course, to the two 'student' evaluators, Peter Stanton and Greg Kaminsky.
