This product was developed by the author with the support of the Feminist Innovation in Monitoring and Evaluation Award Program, implemented by the Global Evaluation Initiative with the generous financial support of Global Affairs Canada and in collaboration with EvalGender+. The views expressed in this publication are those of the author and do not necessarily reflect the views of the Global Evaluation Initiative (GEI) or Global Affairs Canada. For more information, visit the GEI website.

It was also developed with the support of Fundación Datalat, and with the collaboration and validation of the toolkit by the Subsecretaría de Diversidades del Ecuador.

This publication may be freely reproduced and shared, provided that proper authorship is acknowledged and its content is used ethically.

## **Project objective**

The project “Measuring Change: Tools for Evaluating and Strengthening Gender Policies from a Feminist Perspective” presents a set of methodologies, a guide for developing indicators, and training materials that strengthen the evaluation and monitoring of gender policy action plans, thereby improving the processes of data collection, analysis, and reporting of results within institutions and programs.

## **Project beneficiaries**

The direct beneficiaries of this project are the technical and institutional teams responsible for monitoring and evaluating gender policies, who now have access to tools, methodologies, and training materials designed to strengthen their capacities from a feminist and intersectional perspective.

At the institutional level, ministries, secretariats, and public agencies involved in promoting gender equality also benefit, as they will be able to apply these tools to improve the quality, relevance, and focus of their evaluation processes.

Indirectly, the project benefits women, gender-diverse individuals, people in transit, and other historically excluded groups by contributing to the design and strengthening of public policies that are fairer, more inclusive, and more responsive to their realities.

## How is the project structured?

### Component 1: Toolbox

- Training manual for evaluation teams (Pilot project).
- Methodological Guide for Evaluating Gender Action Plans and Policies from a Feminist and Intersectional Perspective.

### Component 2: Replicability

- The tool has been designed to be replicable and adaptable to different institutional and regional contexts in Latin America and the Caribbean. To this end, it includes manuals and methodological guides that facilitate its implementation by various institutions interested in strengthening the evaluation of gender policies.

## What tools will you find?

1. Training manual for evaluation teams (Pilot project).
2. Methodological Guide for Evaluating Gender Action Plans and Policies from a Feminist and Intersectional Perspective.
